

Simple, Secure, Available...
Set a new IT support strategy in motion!

Smart Host GOV

Agency Cloud Computing

Omega Systems' Smart Host private cloud solution is a fully-equipped, maintenance-free alternative to the traditional in-house IT environment. You no longer need to make large investments in rapidly depreciating hardware. Omega Systems' private cloud solution reduces your financial liability by eliminating large capital purchases and unpredictable maintenance costs to a manageable, fixed-cost solution.

Leverage our Investments to Multiply Your Productivity

Smart Host is built on a grow-as-you-go platform scaled to fit the pace of your agency. Adopting this IaaS model, means you leverage our investments of best-in-class hardware and software capabilities, as well as business continuity and multiple levels of security, all above the industry standard.

Smart Host is a perfect option to support:

- COBRA.net
- SUPERCobra.net
- RMS (records management systems)
- Any other servers holding valuable CJI data

Omega Systems Data Center maintains yearly SSAE 16 AT 101 SOC 2 certification, ensuring client data is properly handled in a professionally controlled and regulated environment.

Always Ahead of the Game

Omega Systems' private data center is not only CJIS compliant, but holds the honorable distinction as the FIRST and only regional, private data center to have successfully completed a CLEAN technical audit, performed by a licensed Pennsylvania State Police CLEAN/CJIS Information Security Officer.

Costs

- Fixed-Cost Structure
- Scalability
- Measurable Cost Savings
