### Smart Secure Network Security at the Firewall Level

#### A Simple & Effective Way to Apply Advanced Threat Protection to Your Network

When trust is everything, and top notch customer service is your bank's main goal, REACTING is the worst case scenario. Omega Systems' skilled professionals have partnered with Fortinet, an industry leader in IT security hardware, to develop a proactive, professionally managed security plan (Smart Secure) that keeps banks not only compliant, but a step ahead of cyber threats. This product is unlike anything offered by other local IT firms, and was developed specifically to meet the needs of bank's growing IT security challenges.

#### Enhance Your Cyber Security Strategy & Stay Ahead of Threats

Smart Secure, by Omega Systems, is an option-based, managed network security defense, designed to add a layer of protection at the firewall level. This turn-key solution was designed on a tiered platform to accommodate varying security objectives - ranging from the basics of enhancing hardware threat protection to more complex functionality of satisfying punitive, regulatory, audit requests and compliances. Benefits Include:

- Sophisticated Risk Management
- Multi-Layered Security
- Vulnerability Scanning
- Local 24 x 7 Support
- Patch Management
- Customized SIEM Reporting
