

Owning and operating a business is risky.
We provide the safety net.

Smart Stor

Remote Online Backup

While today's small to medium-sized businesses understand the importance of backing up business critical data, some are tempted to cut corners, or simply direct budgetary dollars toward infrastructure upgrades.

Conversely, as the use of technology continues to increase exponentially, growing businesses realize the importance of strengthening an appropriate, up-to-date backup plan to ensure maximum, unfailing IT performance. The strategy behind every businesses data protection plan can make the difference in reducing revenue loss by increasing data recovery times and ensuring data integrity.

Omega Systems' Smart Stor solution provides small and medium-sized businesses with a secure, remote, online backup of their corporate data, at an affordable, pre-determined rate.

The solution is scalable with customizable options. Smart Stor's dedicated storage space easily grows at your pace to suit your ever-changing requirements.

As part of your monthly subscription, Smart Stor:

- Protects mission-critical business information for disaster recovery scenarios
- Provides same day file restoration during an emergency situation
- Fully encrypts and compresses data before online transfer

Available Retention Options

14 Day Backup	1 Year Retention	3 Years Retention	7 Years Retention
<ul style="list-style-type: none">• We perform intra-daily backups and store them for a rolling 3 day period. After 3 days, those backups are consolidated into single daily backups and stored for a rolling 14 day period.• For customers that elect 1, 3 or 7 year retention plans, the daily backups are rolled into monthly backups after 14 days. They are then stored for the duration of your selected retention plan.• Data recovery is available upon request from any of your stored data sets.
