

Keeping you connected.
Anytime, anywhere, on any device.

Smart Mail Hosted Exchange

Running email in-house is resource-intensive, costly and time-consuming. Omega Systems' Smart Mail provides the mobility, flexibility, and performance you expect from a powerful Microsoft Exchange email solution, without the in-house hassle. It offers best-in-class email functionality, collaborating tools and all the features of the latest Outlook products. You'll benefit from automated upgrades and patch management, the elimination of costly on-premises dedicated storage and increased time to focus on important business objectives.

Smart Mail is supported through our redundant data center strategy. This approach provides additional layers of resiliency guaranteeing availability as well as providing additional data safeguards through our robust security measures.

Mobility & Accessibility

Automatic wireless synchronization keeps you connected to your colleagues and customers, regardless of your location. The Outlook Web App (OWA) allows email access anytime, anywhere, on your laptop, desktop and mobile device.

Security

Spam filtering, email encryption and advanced industry leading security measures allow our customers to feel reassured that their corporate email is safe in the Omega Systems in-house data center.

Personalized Support

Email is a critical function of every business. Our responsive team of engineers is dedicated to providing remote or onsite support to ensure our customer's business communications never stand still.
