

## Fortify Your Network with Proactive Protection.

### Are Your Applications Vulnerable to Malware?

## Third Party App-Care [With Seamless Integration] Third Party Application Preventative Maintenance Tool

### The Challenge

As a threatening IT landscape continues to evolve, so also does the need for fast, easy and safe patching capabilities. The steadily increasing volume of vulnerabilities threatens business' core functionality and productivity on a daily basis. Running unpatched 3rd party applications\* leave your end user devices exposed to malware.

### The Solution

Employing proper patching policies can help your business run more efficiently, while offering expert-level protection to your network. Adding Omega Systems Third Party App-Care simplifies the patch process with automatic updates.

- Seamlessly Integrate Patching Capabilities to Applications
- Close Security Holes
- Correct Problems
- Improve Product Functionality
- Guard Against Attacks

### The Process

Third Party App-Care downloads all updates, including hotfixes, roll-ups, service packs and operating system updates, from their servers and automatically pushes patches to computers within your network.

- *Reduce Expenses*  
*Reduce employee overtime and allow administrators to concentrate on higher priority issues by automating third party patch management.*
- *Boost Efficiency*  
*Experience an increase in IT operational efficiency by reducing the issues that slow end users' devices.*
- *Close Security Gaps*  
*Remove security vulnerabilities from third party applications and reduce time spent removing malware from network hardware.*

### Easily Incorporate Best Practices

Although perfect for any size or type of business, this tool is ideal for growing businesses with multiple departments or locations, where patch management is more complex. For enhanced scalability, global deployment policies are enabled. Also, customization options are available for location, client, agent-level or user-defined exceptions.

\* **Third Party Applications:** Adobe Flash, Adobe Reader, Adobe Shockwave, Firefox, Java, Google Chrome, Safari, Thunderbird, iTunes, QuickTime & Skype.
