

Smart Host

Private Cloud Hosting Platform

See the clear potential in a robust & resilient infrastructure designed with the flexibility today's businesses need to power private and hybrid cloud operations

Modern challenges, including those posed by evolving cybersecurity threats, increasing regulatory requirements and staffing shortages, demand that organizations employ IT infrastructure that not only performs but excels.

As a private cloud solution, Smart Host delivers the customized, secure, high-performance environment businesses today require to power their operations.

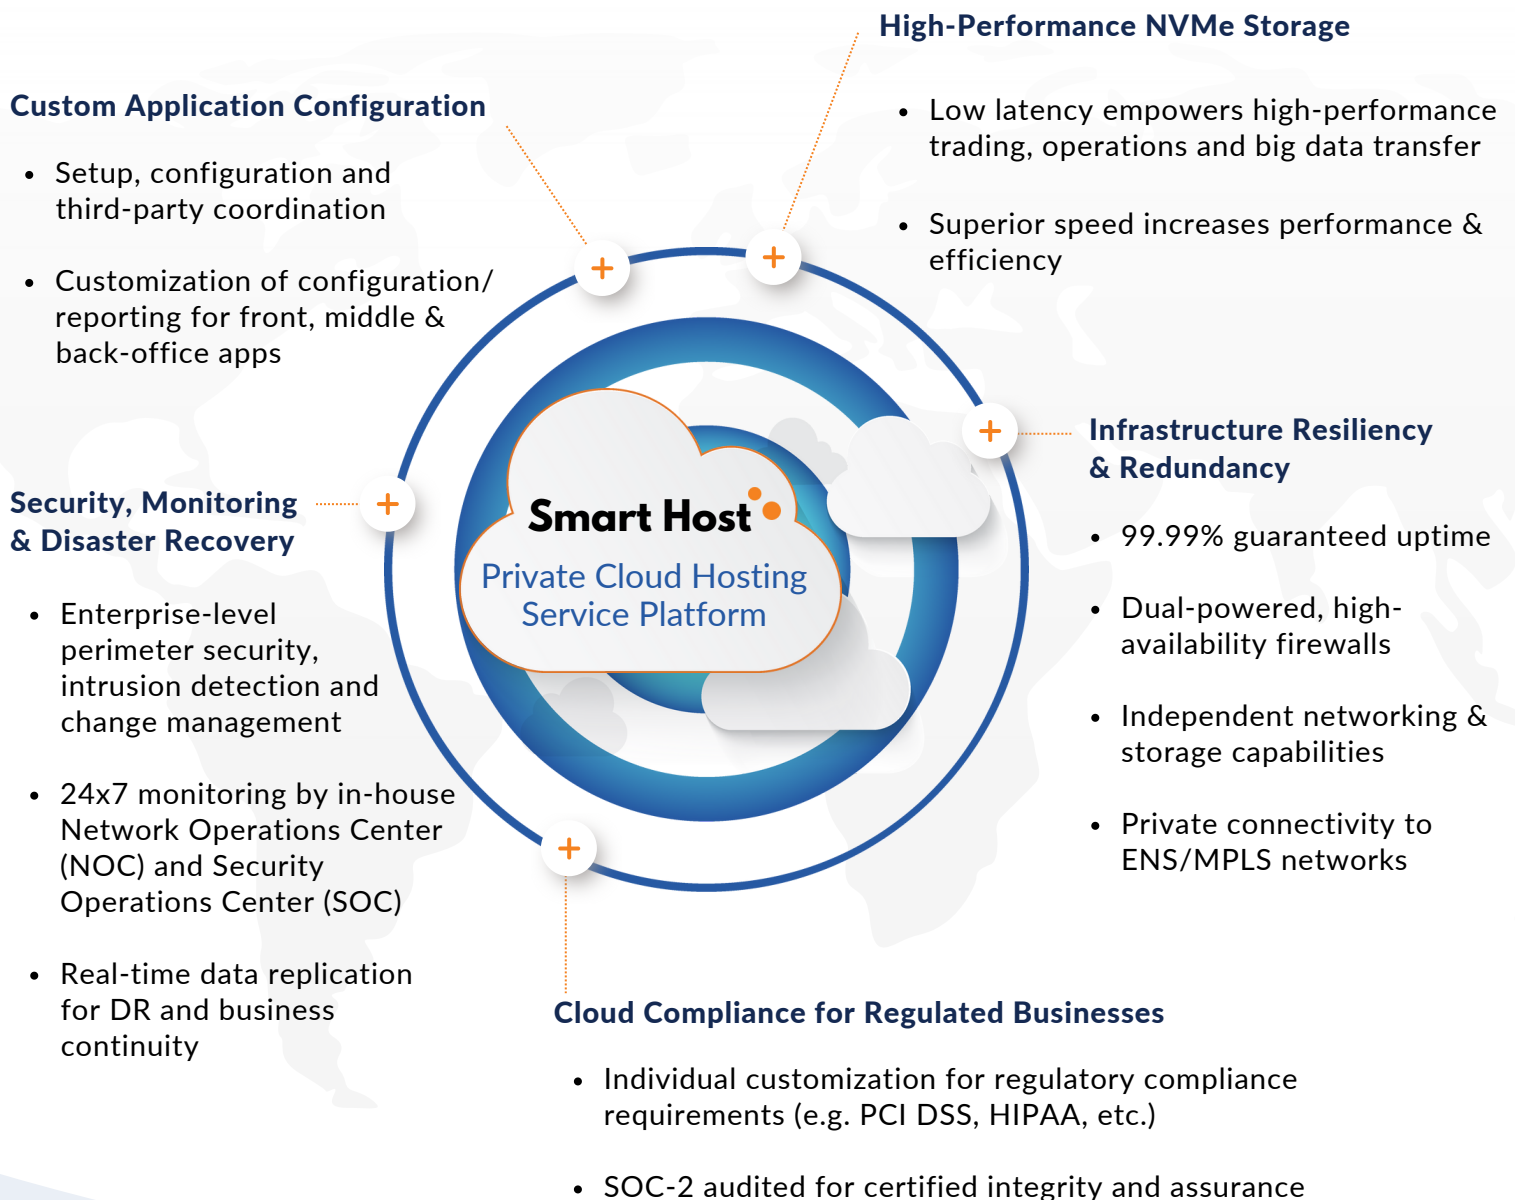

As a Smart Host customer, you'll benefit from the following:

-  **Deep layers of security** to fortify your operations, minimize risk and protect your sensitive data and applications
-  **Professionally managed IT support** including end-to-end monitoring and 24x7 Service Desk availability
-  **A commitment to compliance** that ensures your cloud environment meets growing standards for regulatory compliance
-  **Secure, offsite data backup and replication** to our secondary data center for disaster recovery & business continuity
-  **Predictable and flexible cost structures** to reduce your capital expenditures and give you maximum control over your IT budget

Smart Host Features & Benefits

Smart Host delivers the customized, secure, high-performance environment required to power your business-critical operations. Unlike other providers, we own, operate, maintain and certify our cloud infrastructure – acting as your single source for accuracy, accountability, security and compliance.

Embedded Security & Compliance

Smart Host is protected by the fortified walls of our privately-owned, SOC-2 certified data center. Built from the ground up, our data center gives customers of all sizes and across all industries the assurance that we are handling their critical data in a professionally controlled, secured and regulated environment.

SOC 2-Compliant for 10+ Years

Omega Systems takes security and compliance seriously, which is why we proactively undergo an annual SOC 2 audit, which not only mandates but also validates the integrity and security of our internal controls and information security practices.

Omega's data center meets or exceeds infrastructure and data protection requirements for:

- PCI DSS
- FDIC
- SEC
- GLBA
- FISMA
- DoD/CMMC
- DISA
- NIST
- Hitrust
- HIPAA
- CJIS

First to Achieve CLEAN Compliance

Omega's cloud infrastructure is secured by the first regional private data center to successfully complete a CLEAN technical audit and complies with data security standards set forth by the Criminal Justice Information Services (CJIS) division of the FBI.

Enterprise Level Backup & Security

Utilizing advanced perimeter security, on-site power/cooling, and monitored by our in-house Security Operations Center, Smart Host users retain the optimized performance, flexible management and business continuity they need to accelerate their productivity.

6-Day Self-Sufficient Power Generation Backup:

UPS units are always available following "N+1" model

Redundant Cooling Systems:

Fire suppression system is designed to mitigate fires quickly, without damage to equipment

Highly Sophisticated Network Security System:

Maximum-level preventative securities guard against cyber terrorism

Restricted Biometric Access:

Physical access is highly restricted and only permitted to select authorized personnel

Get Smart about Cloud Hosting

At Omega Systems, requirements for flexibility, security, performance and compliance are paramount. Let Smart Host deliver the resources you need from a fully private solution or as part of a hybrid cloud environment.
