

Smart Support[®]

24x7 Managed IT Services

Experience a unique and personalized approach to managed IT support fueled by proactive monitoring and security and backed by an award-winning customer service team.

The modern digital age, for all its benefits, requires a thoughtful, proactive, and continuous commitment to IT management and support – to power operations, safeguard critical assets and enable future growth.

With managed IT support from Omega Systems, businesses can realize a high-value managed service that continually monitors the health and performance of IT networks and supports the detection and remediation of technology issues before they lead to unnecessary downtime or data loss.

Smart Support Features

Smart Support packages offer the flexible managed IT services you need at any stage of your development, whether it's a fully outsourced IT solution or a support package that augments or enhances your existing team. Features include:

- Multi-layered threat protection
- Anti-virus and anti-malware scanning
- Regular Microsoft patching & maintenance
- Device auditing & health reporting
- Network performance monitoring
- Notification and remediation of security threats
- Third-party application patching
- Remote and/or on-site support

Premier, Award-Winning MSP Support

Our custom IT support services acknowledge the unique factors within your business and ensure you experience seamless, reliable and robust support right-sized to your business's needs. Regardless of industry, internal resource capacity and operational requirements, Smart Support customers experience enterprise-level IT service and support from Omega Systems day-in and day-out.

Call Answer Rate

Omega's Service Desk receives an average of 5,000 calls per month and maintains a consistent call answer rate (CAR) that exceeds industry standards.

Average Wait Time
25 seconds

Customer Satisfaction Score
