Co-Managed IT Services

omega systems
technology managed

When resources, bandwidth or experience are limited, turn to Omega for professional MSP expertise to lead or support projects & initiatives.

In today's dynamic business landscape, even the most efficient internal IT departments can benefit from additional support to navigate the complexities of infrastructure management, cybersecurity threats, and maintaining peak performance. That's where co-managed IT services come in. At Omega Systems, we offer a valuable solution that combines the control and convenience of an in-house IT team with the expertise and scalability of a trusted managed services provider (MSP).

Unleash Your Team's Potential with Co-Managed IT

Your IT requirements are constantly evolving, and so are your team's responsibilities. By partnering with Omega Systems, you can offload ongoing tasks, enabling your team to focus on strategic projects that add value to your organization. We bring innovative technology tools and expert guidance to enhance the effectiveness of your IT program, providing the support and resources you need when you need them.

Benefits of Choosing Omega Systems' Co-Managed IT Services:

Reduced Stress for Internal Teams
Relieve the burden on your IT staff, allowing them to concentrate on critical initiatives.

Faster Support
Benefit from prompt response times and efficient issue resolution.

Minimized Disruptions
Experience fewer disruptions and optimized system performance.

Decreased Downtime
Proactive monitoring and quick troubleshooting lead to reduced downtime.

Predictable Budgeting
Enjoy the peace of mind that comes with predictable IT costs.

Industry-Specific Expertise
Access specialized knowledge and guidance tailored to your industry.

Protect Your Data and Operations

Backup and Disaster Recovery
Data availability is crucial for business continuity. Our customizable backup and retention solutions, paired with aggressive Recovery Time Objectives (RTOs), guarantee the protection and accessibility of your critical data. Regular diagnostic reports enable you to monitor your backup infrastructure effectively.

Streamline Your Transformation

Cloud Management & Migration
If you're considering embracing the cloud, our expert consultants can help you determine the ideal hosting solution and support you throughout the migration process. We ensure availability and performance while customizing infrastructure and implementing robust security measures.

Ensure Smooth Operations

NOC & Escalation Services
Even the most advanced technologies can encounter unexpected failures. Omega Systems' Smart Response NOC and escalation services provide a proactive and efficient response protocol to address IT requests promptly, preventing operational disruptions and mitigating larger infrastructure issues.

Safeguard Your Business

Cybersecurity Management
Cyber threats are constantly evolving, demanding significant resources to stay ahead. Omega Systems offers proactive monitoring, vulnerability scanning, unified threat management, and outsourced SIEM and SOC services. Our experienced team ensures that your operations remain secure and uninterrupted, while relieving you of the time-consuming task of monitoring, managing, and reporting on security threats.

Unlock the Full Potential of Your IT Program with Co-Managed Services

Co-managed IT services from Omega Systems optimize productivity, enhance cybersecurity, and provide faster resolution of IT issues. Our certified technicians and consultants bring deep expertise to your organization, enabling you to focus on strategic priorities and stay up-to-date with the latest technology advancements.

Partner with Omega Systems, your trusted provider of co-managed IT services and ad hoc support. Our approach enhances security, reliability, and efficiency without straining your internal staff.
