omega shield

Managed IT Security
That Reduces Risk and Improves Control

A managed security bundle that delivers stronger threat detection, faster response, and greater control over access, data, and exposure through a consistent, scalable security operating model with predictable per-user pricing.

Managed IT Security Bundle

Essential Security, Always Included

Every Omega Shield customer benefits from a purpose-built operationalized security core that elevates baseline cybersecurity controls — reducing exposure, improving detection, and delivering consistent response.

Proof Over Hype

We maintain our own **in-house SOC** giving customers direct access to Omega analysts who know their environment and act without delay.

More than 80% of our SOC team is CISSP-certified, ensuring threats are handled by experienced security professionals, not entry-level analysts.

Our SOC maintains a **93.6% all-time** customer satisfaction score, reflecting consistent, high-quality response and trusted security operations.

Critical IT security essentials included in both Omega Shield tiers

We've purpose-built these core services into every tier to eliminate gaps, reduce alert fatigue, and ensure threats are addressed quickly and effectively.

- Managed Detection & Response (MDR)*
- 24x7 Security Operations Center (SOC) monitoring & triage
- Multi-factor authentication (MFA) management*
- Email security and cloud email backup*
- Email authentication and domain protection
- DNS content filtering
- Extended Endpoint Detection & Response (XDR)
- Predictable, per-user pricing

 * *Service scope and availability scale by tier, as shown on page 3.*

Two Tiers. One Mission.
Reduce risk without adding operational burden.

omega shield	ESSENTIAL	ADVANTAGE
Best for:	Organizations that need continuous security visibility and reliable threat detection	Companies that require deeper insight, stronger governance and proactive risk management
Managed Detection & Response (MDR)	Yes	Advanced
24x7 SOC Services	Yes	Yes

Why Omega Shield?

With Omega Systems, you gain more than a set of capable security tools. You gain a trusted partner dedicated to safeguarding systems, maintaining operational stability, and supporting compliance-driven security goals.

Security at Scale

As your environment and attack surface expand, Omega Shield scales alongside your users, systems, and cloud services, ensuring continued protection as your business evolves.

24x7 Security Expertise

Your environment is continuously monitored by Omega's in-house Security Operations Center, with experienced analysts investigating and triaging threats around the clock.

Reduced Operational Burden

We manage the tools, alerts, tuning, and workflows associated with your cybersecurity program so your team can focus on running the business, not chasing false positives.

Executive-Ready Security Visibility

With centralized monitoring, risk assessments, and prioritized findings, Omega Shield provides clear, defensible insight into your security posture for executives, auditors, and stakeholders.

Built for Real-World Environments

Omega Shield supports both fully managed and co-managed models, integrating with existing IT operations and meeting you wherever you are in your security maturity.

Clear, Predictable Pricing

Our simple, per-user pricing structure means simpler budgeting, no surprise fees and full confidence that your security spend is aligned with your risk appetite.
