

MOVE FORWARD WITH AI CONFIDENCE

Omega AI Ready (AI Posture Assessment)

AI can help your workforce increase productivity, but it can also amplify gaps in data security and access controls.

Omega AI Ready assesses your Microsoft 365 or Google Workspace environment to uncover sensitive data exposure, identify the AI tools connected to your data and prioritize the steps needed to reduce risk. Whether you're preparing to adopt AI or concerned about tools already in use, you'll gain a clear picture of your exposure and a prioritized roadmap to guide next steps.

Planning Ahead or Assessing Today

READY WHEN YOU ARE

Whether your priority is adopting AI or understanding existing risk, Omega AI Ready helps you understand your exposure and prioritize what comes next.

Planning to Adopt AI

For organizations considering Copilot, Claude, ChatGPT or another assistant – understand your risk areas and identify where AI can help before you enable it.

Protecting Against AI

For organizations concerned about AI tools already connected to company data – discover what they can access and where sensitive information may be exposed.

Why AI Ready?

Get Clarity That Drives Action

- ✓ **See the actual exposure.**
Get concrete findings and real file counts that show where sensitive information is at risk.
- ✓ **Set clear priorities.**
Understand which exposures and gaps to address first and what the corrective action may involve.
- ✓ **Inform your AI investment.**
Understand your environment's readiness before committing to new AI tools and licenses.
- ✓ **Keep the effort manageable.**
Omega leads the assessment with no disruption to your team – just a short kickoff and a final readout.
- ✓ **Put findings in context.**
Understand data security and governance risks through the lens of your industry, including HIPAA in healthcare and SEC/FINRA in financial services.

Visibility Starts Here

WHAT WE ASSESS

Omega AI Ready evaluates how data in your Microsoft 365 or Google Workspace environment is shared, accessed and governed, including what connected AI tools and applications can reach. Five assessment areas provide a clear picture of your current exposure and readiness for AI.

- 01 Oversharing and public links:**
How much sensitive data is accessible to anyone with a link – with actual file counts.
- 02 Sensitive data exposure:**
Where PII, PHI, financial and other confidential data lives, and how much of it is shared outside your organization.
- 03 Identity and access:**
Multi-factor authentication coverage across all accounts, including service and shared accounts, plus access risks involving guests, privileged users and departing employees.
- 04 Data governance configuration:**
Data loss prevention settings, sensitivity labels, external sharing controls and permissions to create new groups and sites.
- 05 Shadow AI and shadow IT:**
Which AI tools and unsanctioned applications are already connected to your data and what they can access.

Our Rollout Process

CONNECT

Kickoff & Access

Confirm goals and scope, name your key contacts and set up access to your Microsoft or Google environment.

ASSESS

AI Posture Assessment

Evaluate sensitive data exposure, access controls, governance settings and connected AI tools.

PRIORITIZE

Findings & Roadmap

Build your AI Posture Assessment Report and roadmap, with prioritized fixes and recommended next steps to support safer AI adoption.

REVIEW

Leadership Briefing

Walk through your findings and AI posture score with Omega's AI & Automation Team and align on next steps

Take the Next Step

KNOW YOUR EXPOSURE. PLAN YOUR NEXT MOVE.

Whether you're preparing to adopt AI or evaluating tools already in use, your next step starts with understanding what they can access.

Omega AI Ready gives you a clear picture of sensitive data exposure, opportunities for AI adoption and a prioritized roadmap, backed by guidance from Omega's AI & Automation team.

Let's talk about your next step toward safer, smarter AI.
